DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Eugene Palazzo on 2/27/08.

Claim 4 has allowable subject matter and is incorporated into claim 1. The case has been amended as followed (amendments are underlined):

Claim 1 should now read:

A method to reduce a total inter-document zone region in a multi-pitch intermediate multi-pass system, comprising:

shifting individual inter-document zones, in a multi-pitch intermediate multi-pass system, in accordance with asymmetric timing of start and stop times of processes occurring within the individual inter-document zone;

shifting individual images, in a multi-pitch intermediate multi-pass system, forward to a position outside of a normally synchronized position of the image;

wherein the individual images, in a multi-pitch intermediate multi-pass system, are shifted forward to a position outside of a normally synchronized position of the image when a transfer start requires a larger time than transfer stop;

varying an arrangement of similarly asymmetric inter-document zones to precess each successive document; and

determining a minimum inter-document zone in accordance with an inter-document zone requirement associated with a transfer start and a requirement to provide synchronous images on successive passes within each document.

Claim 4 is canceled since it has been incorporated into independent claim 1.

Allowable Subject Matter

Claims 1-3 and 5 allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record discloses arrangements to increase printing speed by shifting image data to reducing printhead downtime between pages of documents in a multi pass system. However, no prior art of record discloses the constraint of performing the shifting data based upon when a transfer start requires a larger time than transfer stop.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
